

Catalase DO Series

● Introduction

Catalase DO series are produced by microbial submerged fermentation. These are used to remove residual hydrogen peroxide after the bleaching of fabrics. There are three products in this series, which are DO-101, DO-201 and DO-301 respectively.

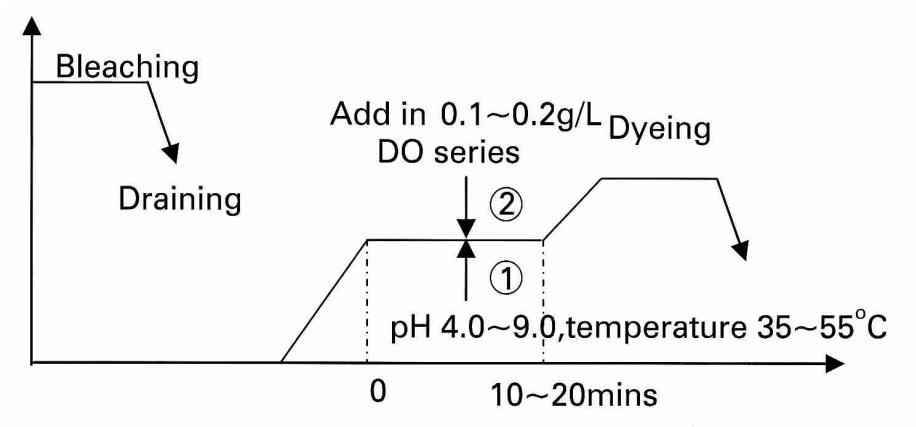

● Physical and Chemical Specification

- ☆ Appearance : light brown liquid
- ☆ pH value : 5.1~5.3

● Advantages

- ☆ High Efficiency
- ☆ Wide pH (4.0-9.0) and wide temperature (35-55°C) range
- ☆ Water saving

● Direction for Usage

● Packing

25Kg/plastic drum.

● Storage and Safety

Store at 4~25°C under dry, shaded and cool condition and avoid high temperature and direct sunlight. Please close the container after getting the material to avoid contamination. If the enzyme gets in touch with your skin or eye, immediately flush with water for at least 15 minutes. Shelf life : 6 months.

○ Compatibility of other auxiliaries and process need to be checked before application
